SUNSONG is our brand, and we have been focusing the stainless steel area for more than 20 years. We firstly started from the raw flat sheets of stainless steel material, and then we do the surface finish of the coil and flat sheets, and then we have established our own one stop service manufacture base where we have the most machines to do coil cutting, flatting, surface finish (Hairline, Satin, Brush, Vibration, Bead Blasted, Mirror, Mirror Etching, and so on.), PVD finish (Silver, Gold, Bronze, Nickel Silver, Black, SS Black, Brown, Coffee and so on.), AFP finish, laser cutting, bending, v-grooving, welding and so on. So to now, we can make the whole series of Stainless steel trash cans as above. And we have the ability to do large quantity OEM.

One of the main advantages is that stainless steel is much more hygienic than its plastic counterpart. It is easy to clean, and smells have a much harder time penetrating the material. Automatically, this gives your office space a much fresher feel and creates a more positive working environment.

Speaking of durability, it's both the design and components that go into the trash can that make it last so long. When the exterior of the can is made of stainless steel instead of a cheaper material, like plastic, it won't absorb odors, stain, or degrade as quickly. Stainless steel absorbs less odor than plastic, too, so that's another reason to upgrade your can—other than just aesthetics.
